communication of human beings Origins of Human Communication (Jean Nicod Lectures):

12 of 12 review helpful Best in the hot Evo of language field By Jake Keenan This is a really good book It is the best among the current evolution of language books And it is an easy reading excursion into the attentional and gestural dynamics of great apes and children Although intended for an academic audience it still retains the feel of its origins in a series of lectures For those who don't know Michael Tomasello Human communication is grounded in fundamentally cooperative even shared intentions In this original and provocative account of the evolutionary origins of human communication Michael Tomasello connects the fundamentally cooperative structure of human communication initially discovered by Paul Grice to the especially cooperative structure of human as opposed to other primate social interaction Tomasello argues that human cooperative communication rests on a p Underscoring the uniqueness of humans is all too easy The challenge is to explain it in a naturalistic perspective Michael Tomasello meets the challenge with his unique suite of competencies in animal and human psychology and his ability to think and write
