By Peter T. Ellison : Reproductive Ecology and Human Evolution (Evolutionary Foundations of Human Behavior) evolutionary psychology in its broad sense the term "evolutionary psychology" stands for any

attempt to adopt an evolutionary perspective on human behavior by human ultrasociality and the invisible hand foundational developments in evolutionary science alter a foundational concept in economics Reproductive Ecology and Human Evolution (Evolutionary Foundations of Human Behavior):

The study of human reproductive ecology represents an important new development in human evolutionary biology Its focus is on the physiology of human reproduction and evidence of adaptation and hence the action of natural selection in that domain But at the same time the study of human reproductive ecology provides an important perspective on the historical process of human evolution a lens through which we may view the forces that have shaped us as a species I lquo The volume is a useful compendium of contemporary reviews and research reports of human reproductive ecology It is rich in review material and in proposed heuristic models The book is heartily recommended for graduate courses and I will be us
