By Meg Daley Olmert : Made for Each Other: The Biology of the Human-Animal Bond ethology is the scientific and objective study of animal behaviour usually with a focus on behaviour under natural conditions and viewing behaviour as an glossary of biological terms

1 of 1 review helpful Made for Each Other The Biology of the Human Animal Bond By Earl O Strimple Thirty some

years ago I had many conversations with some veterinary friends of mine about the mysterious and powerful force that drew clients and pets through our doors and compelled us through years of veterinary school and into lives devoted to the care of animals. It seems hard to believe now but people paid little or no Nothing turns a baby's head more quickly from nursing or playing than the sight of a dog or any animal. Made for Each Other lays out both sides of this deep mutual connection and the way it has evolved since prehistoric times. Drawing on the fascinating work of scientists in many fields from neuroscience to zoology and anthropology as well as her own investigations, Meg Daley Olmert shows the roots of this age-old bond and its great importance to our well-being. From Booklist: Many people will attest to the happiness pets bring but few are aware of the neurochemical basis. In one of those delectably synergistic books that tie together threads of science, history, and ever
