By Richard Wrangham : **Catching Fire: How Cooking Made Us Human** oct 22 2012nbsp;raw food takes too long to digest and offers too few calories to grow a human brain cooking it is the key fire is the rapid oxidation of a material

in the exothermic chemical process of combustion releasing heat light and various reaction products slower oxidative  
Catching Fire: How Cooking Made Us Human:

5 of 5 review helpful Definitely worth a read By Bill Gonch This is really a good book on an important topic that just does not get much coverage the anthropology of food Now there are quite a few people who express theories on what made us human and what our distant ancestors ate Wrangham is one of the few who combines the two topics Put briefly that major points of his argument are as follows The emerg Ever since Darwin and The Descent of Man the existence of humans has been attributed to our intelligence and adaptability But in Catching Fire renowned primatologist Richard Wrangham presents a startling alternative our evolutionary success is the result of cooking In a groundbreaking theory of our origins Wrangham shows that the shift from raw to cooked foods was the key factor in human evolution When our ancestors adapted to using fire hum From Publishers Weekly Starred Contrary to the dogmas of raw foods enthusiasts cooked cuisine was central to the biological and social evolution of humanity argues this fascinating study Harvard biological anthropologist Wrangham Demonic Males dat
