**By Paul Shepard : Coming Home to the Pleistocene** pleistocene are usually called the ice age through the entire period there have been two large permanent glaciers namely in antarctica and greenland periodic was the mission of the natural history family of museums is to inspire wonder discovery and responsibility for our natural and cultural worlds Coming Home to the Pleistocene:

When we grasp fully that the best expressions of our humanity were not invented by civilization but by cultures that preceded it that the natural world is not only a set of constraints but of contexts within which we can more fully realize our dreams we will be on the way to a long overdue reconciliation between opposites which are of our own making from Coming Home to the Pleistocene Paul Shepard was one of the most profound and original thinkers of our
